FEEL THE MOMENT. SEE WHERE TO LOOK.

A little closer to your world.

A standalone sound-aware watch.
For the moments that bring us together.

Meet SoundBridge

BEYOND THE SCREEN

A wearable conc

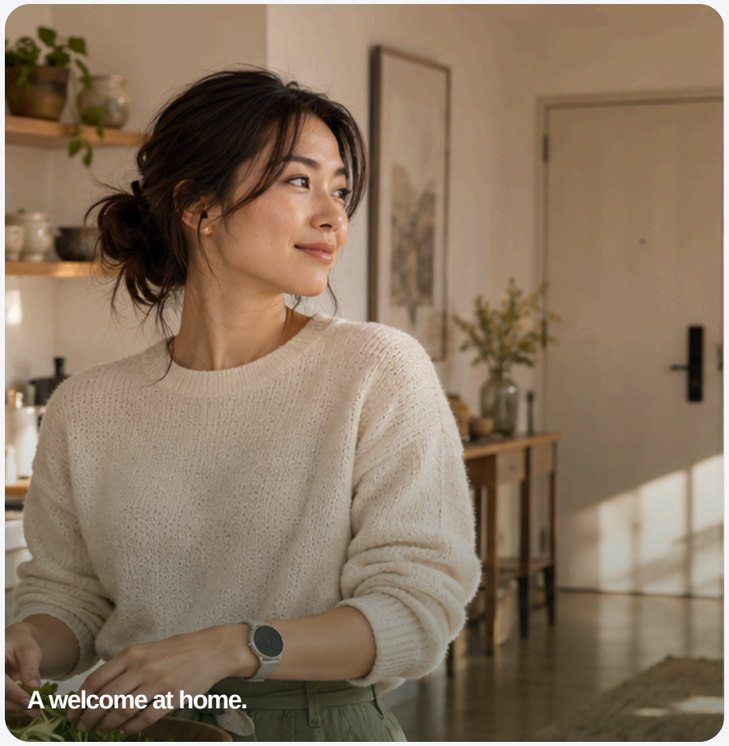

THE SMALL THINGS

Some moments begin with a sound.

A doorbell. A conversation.
A bicycle passing by.

EVERYDAY LIFE, ON YOUR TERMS

Stay in the moment. Stay connected.

THE SOUNDBRIDGE EXPERIENCE

A sound.
A feeling.
A little context.

Recognize a sound. Feel a distinct vibration.
Glance at what happened and where to look.

Doorbell | Speech | Bicycle bell

Interactive alert preview

MORE FREEDOM. LESS TO THINK ABOUT.

Independence.
Awareness.
Choice.

A useful cue. A little more confidence.
The next move stays yours.

INDEPENDENT BY DESIGN

One watch. A complete experience.

Sense, recognize and respond.

The core experience lives on your wrist.

On-watch sensing → On-watch AI → Wrist alerts

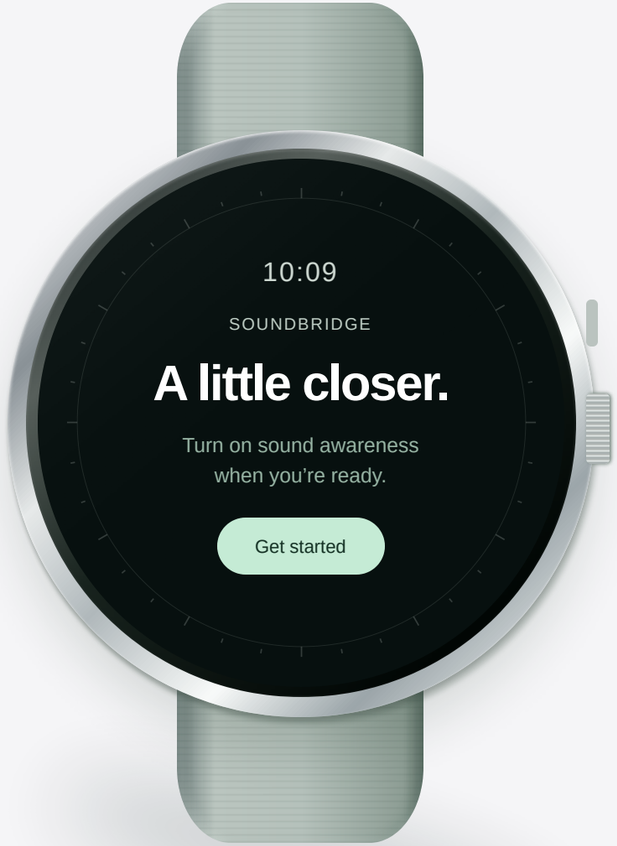

SET UP ON THE WATCH

Ready in a few simple taps.

1 **Turn on sound awareness.**
You decide when listening begins.

2 **Choose your sounds.**
Keep the cues that matter to you.

3 **Find your feel.**
Preview a vibration that feels right.

Tap the watch to explore setup.

YOUR SOUNDS

Choose what matters to you.

A few familiar sounds.
One personal selection.

- Doorbell ✓
- Speech ✓
- Bicycle bell ✓
- Vehicle horn ✓

4 sound types selected

RECOGNIZABLE AT A TOUCH

A language you can feel.

Different moments. Different patterns.
Learn them at your own pace.

- Doorbell
- Speech
- Traffic cues

Select a pattern to preview its rhythm.

A LITTLE SPATIAL CONTEXT

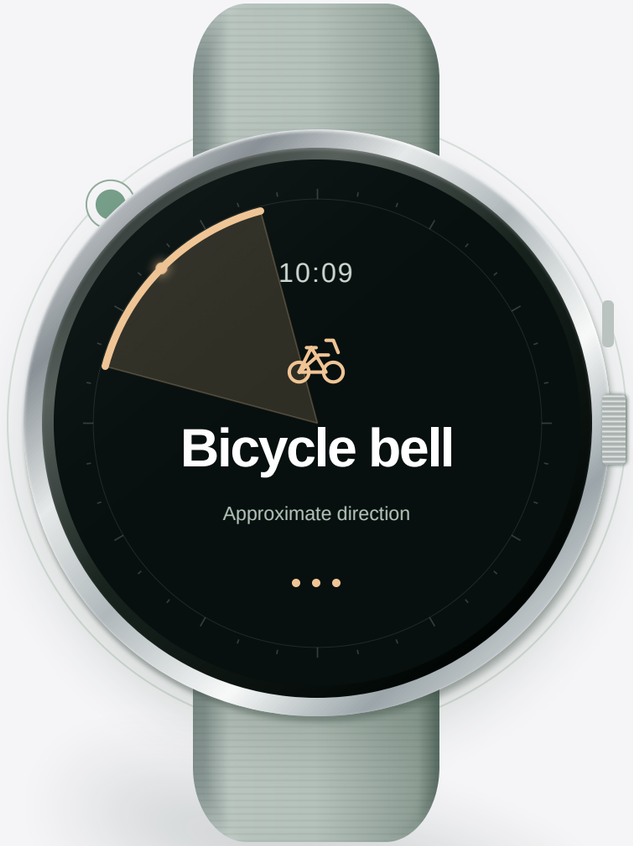

A sense of where. At a glance.

A soft sector marks an approximate sound direction relative to the watch.

Move the sound source 315°

← Rotate around the watch → Illustrative range

Directional sensing assumes compatible multi-microphone hardware. The sector is a concept visualization, not a measured accuracy claim.

The sector follows the watch's frame of reference.

AT HOME

A welcome you can respond to.

Stay with what you’re doing.
A gentle cue lets you know someone may be at the door.

Preview the doorbell

Your home. Your response. Your own time.

IN CONVERSATION

Be part of the conversation.

A gentle cue when speech is nearby.
You choose when to use it.

Conversation mode
Ready when you are.

Detecting speech does not identify who is being addressed.

OUT AND ABOUT

Your pace. A little more context.

A bicycle bell becomes a wrist alert.

Pause. Look around.

Continue your day.

Preview a bicycle bell

An awareness aid. Not a navigation or collision-avoidance system.

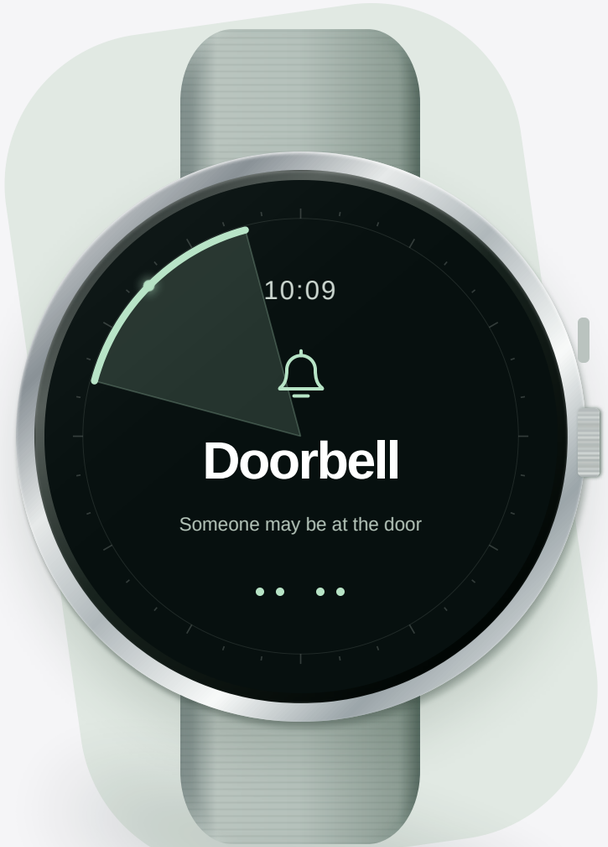

THE RIGHT CUES, AT THE RIGHT TIME

A different rhythm for every part of your day.

Home | Conversation | Outdoors

Doorbell

Focus on familiar cues at home.
Ordinary speech stays in the background.

CONTROL STAYS WITH YOU

You decide when to tune in.

Turn awareness on for the moments you want. Pause whenever you prefer.

Sound awareness

On. Ready for your selected sounds.

SMALL ADJUSTMENTS. A PERSONAL FIT.

Your wrist. Your way.

Clearer text. A different feel.
A watch that fits your preferences.

Text size — Standard

Vibration strength

Gentle | Balanced | Strong

A LOCAL-FIRST CONCEPT

Personal by nature.

Core recognition runs on the watch.

Raw recordings aren’t saved by default.

Your moments stay yours.

On-watch processing

User-controlled history

Proposed privacy defaults. Final hardware and software behavior require validation.

Designed to stay on your wrist

THE CONCEPT INSIDE

Designed to listen. Built to respond.

A complete sensing loop,
imagined for a single wearable.

Proposed architecture. Next: hardware selection, acoustic validation, battery testing and real-world trials.

01

Sense the surroundings.

Microphones capture environmental sounds.

02

Understand on the watch.

Local sound AI and hardware-dependent direction sensing.

03

Make the moment perceptible.

A distinct vibration. A clear event. A direction sector.

THE NEXT CHAPTER

Let the people who wear it lead.

Next comes co-design with deaf and hard-of-hearing people.
Their routines. Their feedback. Their choices.

- Listen
- Try together
- Refine

Illustrative concept photography. No completed user study is implied.

SOUNDBRIDGE

Your world. A little more within reach.

Feel the moment.
See where to look.
Choose your next move.
